

Welcome to this (monthly) edition of the coaching column titled ‘...On Line Delivery’ on Henselite’s website

Sighted in a recent national event, highlights.... Tactical Skill Decisions

Playing from the bottom of the page/ screen up to the head, your team (yellow) is holding 3 shots per the diagram with one delivery and black skip has two deliveries to play with black Skip going first.

Can you identify the options if he was to ask you what to do?

what happened – black played too heavy right forehand pushing their one black bowl out of the head, bounced yellow back behind their shot bowl and the skip’s black bowl joined right and in line with his other black bowls over a metre from the jack – result 3 down no bowl in the head

what does yellow skip do – chose to draw to join other black bowls at rear

what does black skip do – chose backhand yard over delivery without success

Try all options yourself out at training as well as those used by these two skips. Find out what works, what not to try.

Enjoy the read.
